

Financial strategy in game and in life

Developed by Robert Kiyosaki it travelled through the whole world and became popular with the most of fans. Financial games of such a type give the opportunity not only to get more knowledge as for peculiarities of the transactions connected with investments or other forms of their making but help the player to become familiar with some principles as for carrying his own business in a right way. Having become familiar with principles of the game, most of the players can use them in real life while forming their own company. This may be exactly the feature to attract the players of the whole world to this teaching programme.

The author of this programme is considered to be Robert Kiyosaki, a well-known entrepreneur who is also a [successful investor](#). Besides of teaching game being issued by him, he gives the courses teaching all the volunteers to the basics of successful money earning. Among the financial books he published there are quite a lot of bestsellers.

To become acquainted with the game you can download Cashflow and install this game. Here several players can take part at once. You can compete as with computer as with the rivals of the net.

Game field consists of two circles: Rat Race and Fast Track. Each participant throws the dice in his turn and makes the move into the number of cells which were fallen. Among these cells happen to be as positive as negative events. Depending on this the player can incur losses or gain profit. The main point of the game is to get out of the first circle which is one the most difficult tasks.

While playing Cashflow you will learn how to form companies, how to fulfil successful re-sales of real estate, how to make investments in a right way and to keep record of assets and liabilities. The main task of the game is to teach the player to dispose of his finances which should be not only stored but should be invested giving to his owner unfavourable profit.

After having gained a little experience in the game you will start to use your finance correctly, start to open and liquidate credits and will get the information how to lead your own business.
